Combining the work of Peter Blau and Jerald Hage regarding organizational characteristics and efficiency, a correlational model was constructed. The relationship between organizational structure and efficiency is an important and often neglected area of study. The aim of this study is to examine the relationship between organizational structure and efficiency. The study was conducted in a major Egyptian public sector hospital. The hospital is divided into several departments, each with its own manager. The managers are responsible for the management of their departments and are accountable to the hospital's board of directors. The main objective of the study was to investigate the relationship between organizational structure and efficiency. The results of the study support the hypothesis that there is a positive relationship between organizational structure and efficiency. The results of the study also show that there is a significant difference in efficiency between organizations with different types of organizational structure. Furthermore, the study found that there is a significant difference in efficiency between organizations with different levels of organizational structure. The study also found that there is a significant difference in efficiency between organizations with different levels of resources. The study concludes that there is a significant relationship between organizational structure and efficiency.
